ALGEO
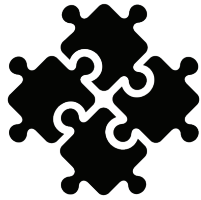

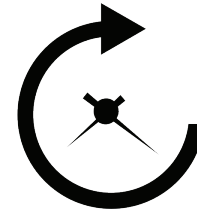

TrueCI

TrueCI unifies your Application Lifecycle by automating workflows and utilizing cutting edge tools for a seamless solution to modern day challenges.

Easy Integration

Our TrueCI solution is implemented with best of breed toolsets or can easily be configured with existing and familiar tools to achieve a cost effective and consistent solution.
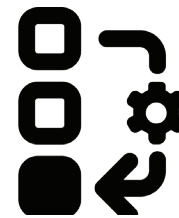

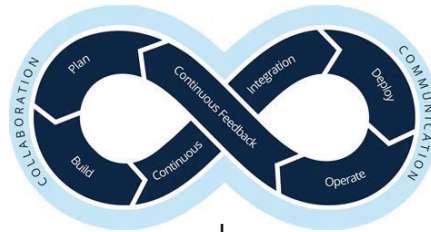

Rapid Deployments

New or Existing Projects, our TrueCI solution jump starts and delivers quickly and efficiently. We implement maximum automation which utilizes latest tools and methodologies in delivering viable solutions in a timely manner.

Improved Quality

Significantly Improved quality with a measured time reduction in lifecycle development. Our integrated and automated workflows provide controlled progression, governance and oversight throughout the entire SDLC.

Streamlined Release

As a Total Solution, TrueCI eliminates significant amount of manual processes from your Software Development Lifecycle. Enabling you to rapidly move high quality applications to production with significantly less people.

Continuous Integration (CI)

Continuous integration (CI) is the practice, in software engineering, of merging all developer working copies to a shared mainline several times prior to delivery. - Grady Booch, 1991

Benefits
Reduced Cost
Faster time to Market
Improved Quality in Delivery
Reduced Manual effort

Success factors
A well defined, adopted and enforced process
Informed and engaged teams
Tightly coupled tools
